2 Maximum Pairwise Product

Maximum Pairwise Product Problem
Find the maximum product of two distinct numbers in a sequence of non-negative integers.

Input: A sequence of non-negative integers.
Output: The maximum value that can be obtained by multiplying two different elements from the sequence.

	5	6	2	7	4
5		30	10	35	20
6	30		12	42	24
2	10	12		7	4
7	35	42	14		28
4	20	24	8	28	

Given a sequence of non-negative integers $a_1, \ldots, a_n$, compute

$$\max_{1 \le i \ne j \le n} a_i \cdot a_j .$$

Note that i and j should be different, though it may be the case that $a_i = a_j$.

Input format. The first line contains an integer n. The next line contains n non-negative integers $a_1, \ldots, a_n$ (separated by spaces).

Output format. The maximum pairwise product.

Constraints. $2 \le n \le 2 \cdot 10^5$; $0 \le a_1, \ldots, a_n \le 2 \cdot 10^5$.

Sample 1.

Input:

```
3
1 2 3
```

Output:

```
6
```
